All About Canada

Capital - Ottawa

National Languages - English, French

Currency - Canadian Dollar (As per current Exchange Rate 1 CAD = 58.45 INR)

Canada, the largest country of North America and the second-largest country in the world, "only" has 35 million inhabitants. This makes it a thinly populated, but prosperous country. It is also a very popular travel destination; both for tourists and business travelers. Many people mainly know Canada for its large cities Quebec, Montréal and Vancouver, even though the much smaller Ottawa is the official capital of Canada. The larger cities of Canada are relatively close to the border with the USA, with which Canada has close ties.

Canada may be very different from your home country, which means there is a great deal to learn about and explore before you arrive in Canada. Canada is made up of 10 provinces and three territories. It can be divided into five regional areas:

Canada is one of the most popular places for people from other countries to find work in. Hundreds to even thousands of people move to Canada, attracted by the steady jobs and high pay, and only furthered by the knowledge that there are many types of jobs available in the country that can suit almost any kind of skill and experience. Despite the debt crisis in Europe and the US, some countries are faring well in these times. A classic example of this is the Canadian economy, which is rapidly recovering from the recession and is on its way back to a stronger position. In recent months, Canadian data on jobs and home sales has been particularly strong and makes for a good indication of the state of the economy.
